

Nelson Legacy Project: March - Signs of Kindness

Project Name: Signs of Kindness

Dates: March 8th-28th

Description: This month, we're inviting everyone in the community to create yard signs with messages of kindness, encouragement, and positivity! These signs can be placed in your yard or around town (with permission) to spread uplifting messages that brighten our community. As people walk or drive through town, they'll be greeted by these messages of kindness and encouragement.

How to Participate:

1. Pick a Theme: Choose words of kindness, hope, or unity. Each message should aim to inspire and encourage.

2. Gather Supplies: If you need materials, we'll have a limited number of blank yard signs and markers or paint available at Black & Blue. You can pick these up on specific days—just let us know! If you would like to buy some, the best “deal” I have found for blank yard signs is [Sign Warehouse](#).

3. Display Your Sign: Place your sign in your yard or another visible location around town (with permission) starting March 8th.

4. Share the Love: Snap a photo of your sign and post it on social media. Don't forget to tag the [Nelson Legacy Project](#) or use #SignsOfKindnessNelsonLegacy so we can celebrate your creation and inspire others.

Immediate Impact:

The Signs of Kindness campaign will create an uplifting and unifying visual experience across town, reminding everyone who sees a sign that kindness is alive in our community. This project is perfect for spring and offers a way for everyone to participate in spreading love and support.

Goal:

Aim to make two or three signs: one for your own yard and one or two to place in other approved locations around the community.

Let's see if we can fill at least 50 spots around town with these messages, so kindness is visible on every corner!

Fill our town with reminders of kindness and connection, creating a visible wave of positivity throughout March! Thank you for being a part of this special project. Your messages will make a difference in our community!
